

Product	DIHYDRO MYRCENOL RECT			
Print Date	09/18/2017	Page	1	(10)

SECTION 1. PRODUCT AND COMPANY IDENTIFICATION

Product name	:	DIHYDRO MYRCENOL RECT
IFF Code	:	00044110
SDS Number	:	R00000219085
Product Use Description	:	Fragrance Compound
Company	:	IFF Benicarló, S.L. Avda. Felipe Klein 2 12580 BENICARLÓ
Telephone	:	+34964470212
Telefax	:	+34964473411
Emergency telephone number	:	+34 964 470 212

SECTION 2 HAZARDS IDENTIFICATION

GHS-Classification

Flammable liquids, Category 3 Skin irritation, Category 2 Eye irritation, Category 2A Skin sensitisation, Category 1 Aspiration hazard, Category 1

GHS-Labelling

Symbol(s)	
Signal word	: Danger
Hazard statements	: H226: Flammable liquid and vapour.
Version	: 4
Revision Date	: 08/03/2017

IFF Benicarló, S.L. Avda. Felipe Klein 2 12580 BENICARLÓ

Telephone: +34964470212

ProductDIHYDRO MYRCENOL RECTPrint Date09/18/2017Page 2 (10)

	H304: May be fatal if swallowed and enters airways.H315: Causes skin irritation.H317: May cause an allergic skin reaction.H319: Causes serious eye irritation.
Precautionary statements	 P210: Keep away from heat/sparks/open flames/hot surfaces. No smoking. P240: Ground/bond container and receiving equipment. P280: Wear protective gloves/ eye protection/ face protection. P301 + P310: IF SWALLOWED: Immediately call a POISON CENTER or doctor/ physician. P302 + P352: IF ON SKIN: Wash with plenty of soap and water. P305 + P351 + P338: IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. P331: Do NOT induce vomiting. P403 + P235: Store in a well-ventilated place. Keep cool.

Carcinogenicity:

No component of this product present at levels greater than or equal to 0.1% is identified as probable, possible or confirmed human carcinogen by IARC.

No component of this product present at levels greater than or equal to 0.1% is identified as a carcinogen or potential carcinogen by OSHA.

No component of this product present at levels greater than or equal to 0.1% is identified as a known or anticipated carcinogen by NTP.

SECTION 3. COMPOSITION/INFORMATION ON INGREDIENTS

Chemical nature

: Fragrance for consumer product

Fragrance Compound: A multi component mixture of fragrance ingredients. The specific chemical identities of the ingredients not listed herein are considered by IFF to be Trade Secrets and are withheld in accordance with the provisions of 1910.1200 of Title29 of the U.S. Code of Federal Regulations.

SECTION 4. FIRST AID MEASURES

First aid procedures		
Inhalation	:	Remove from exposure site to fresh air and keep at rest. If victim is unconscious, remove foreign bodies from the mouth. If victim has stopped breathing, give artificial respiration. Obtain medical advice.
Skin contact	:	Remove contaminated clothes. Wash thoroughly with water (and soap). Contact physician if symptoms persist.
Eye contact	:	Flush immediately with water for at least 15 minutes. Contact physician if symptoms persist.
Ingestion	:	Rinse mouth with water and obtain medical advice.

SECTION 5. FIREFIGHTING MEASURES

Flammable properties	
Flash point	: 109.00 °F (42.78 °C)
Fire fighting	
Suitable extinguishing media	: Use water spray, dry chemical, carbon dioxide or appropriate foam.
Protective equipment and precaut	ions for firefighters

Special protective equipment for firefighters	:	Wear NIOSH approved self-contained breathing apparatus and full protective clothing when fighting fires involving chemicals. Use
		water spray to cool containers exposed to fire.

SECTION 6. ACCIDENTAL RELEASE MEASURES

Personal precautions	:	Avoid inhalation and contact with skin and eyes. A self-contained breathing apparatus is recommended in case of a major spill.
Environmental precautions	:	Keep away from drains, surface- and groundwater and soil.
Methods for containment / Methods for cleaning up	:	Clean up spillage promptly. Remove ignition sources. Provide adequate ventilation. Avoid excessive inhalation of vapours. Gross spillages should be contained by use of sand or inert powder and disposed of according to the local regulations.

SECTION 7. HANDLING AND STORAGE

Handling		Avoid excessive inhalation of concentrated vapors. Follow good manufacturing practices for housekeeping and personal hygiene. Wash any exposed skin immediately after any chemical contact, before breaks and meals, and at the end of each work period. Contaminated clothing and shoes should be thoroughly cleaned before re-use.
		If appropriate, procedures used during the handling of this material should also be used when cleaning equipment or removing residual chemicals from tanks or other containers, especially when steam or hot water is used, as this may increase vapor concentrations in the workplace air. Where chemicals are openly handled, access should be restricted to properly trained employees. Keep all heated processes at the lowest necessary temperature in order to minimize emissions of volatile chemicals into the air.
Advice on protection against fire and explosion	:	Keep away from ignition sources and naked flame.

Requirements for storage areas and containers : Store in a cool, dry, ventilated area away from heat sources. Keep containers upright and tightly closed when not in use.

SECTION 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Components with workplace control parameters

Engineering measures	
Engineering measures	: Where feasible, isolate mixing rooms and other areas where this material is used or openly handled. Maintain these areas under negative air pressure relative to the rest of the plant. Where feasible, use closed systems to transfer and process this material
Personal protective equipment	
Eye protection	: Use tight-fitting goggles, face shield or safety glasses with side shields if eye contact might occur.
Hand protection	: Avoid skin contact. Use chemically resistant gloves.
Respiratory protection	 Use local exhaust ventilation around open tanks and other open sources of potential exposures in order to avoid excessive inhalation, including places where this material is openly weighed or measured. In addition, use general dilution ventilation of the work area to eliminate or reduce possible worker exposures. No respiratory protection is required during normal operations in a workplace where engineering controls such as adequate ventilation, etc. are sufficient.
	If engineering controls and safe work practices are not sufficient, an approved, properly fitted respirator with organic vapor cartridges or canisters and particulate filters should be used:

ProductDIHYDRO MYRCENOL RECTPrint Date09/18/2017Page 6 (10)

	 a) while engineering controls and appropriate safe work practices and/or procedures are being implemented; or b) during short term maintenance procedures when engineering controls are not in normal operation or are not sufficient; or c) if normal operational workplace vapor concentration in the air is increased due to heat ; d) during emergencies; or e) if engineering controls and operational practices are not sufficient to reduce airborne concentrations below an established occupational exposure limit.
Hygiene measures	To the extent deemed appropriate, implement pre-placement and regularly scheduled ascertainment of symptoms and spirometry testing of lung function for workers who are regularly exposed to this material. To the extent deemed appropriate, use an experienced air sampling expert to identify and measure volatile chemicals that could be present in the workplace air to determine potential exposures and to ensure the continuing effectiveness of engineering controls and operational practices to minimize exposure.
Protective measures	In December 2003, the National Institute for Occupational Safety and Health ("NIOSH") published an Alert on preventing lung disease in workers who use or make flavorings [NIOSH Publication Number 2004-110]. In August 2004, the United States Flavor and Extract Manufacturers Association (FEMA) issued a report entitled "Respiratory Safety in the Flavor Manufacturing Workplace". Both of these reports provide recommendations for reducing employee exposure and for medical surveillance in the workplace. The recommendations in these reports are generally applicable to the use of any chemical in the workplace and you are strongly urged to review both of these reports. The report published by FEMA also contains a list of "high priority" chemicals. If any of these chemicals are present in this product at a concentration >= 1.0% due to an intentional addition by IFF, the chemical(s) will be identified in this safety data sheet.

Product	DIHYDRO MYRCENOL RECT		
Print Date	09/18/2017	Page	7 (10)

SECTION 9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance		
Physical state	:	liquid
Appearance Colour	:	CLEAR LIQUID
Colour	•	01011655
Odour	:	conforms to standard
Safety data		
Flash point	:	109.00 °F (42.78 °C)
Vapour pressure	:	1.88 hPa (1.88 hPa)
Relative density (20 °C)	:	0.8010 - 0.8110
Partition coefficient: n-octanol/water	:	log Pow: 2.990

SECTION 10. STABILITY AND REACTIVITY

Conditions to avoid	:	Remarks: Direct sources of heat.
Chemical stability	:	Remarks: Presents no significant reactivity hazard, by itself or in contact with water. Avoid contact with strong acids, alkali or oxidizing agents.
Hazardous decomposition products	:	Note: Carbon monoxide and unidentified organic compounds may be formed during combustion.
