1. IDENTIFICATION OF THE SU	BST	ANCE/MIXTURE AND OF THE COMPANY/UNDERTAKING
Product name	:	MYRRH RESOID 65% TEC BLO
IFF Code	:	00132842
MSDS Number	:	R00000351204
Use of the Substance/Mixture	:	Ingredient used in Flavour and/or Fragrance preparations
Company	:	IFF Benicarló, S.L. Avda. Felipe Klein 2 12580 BENICARLÓ
Telephone Emergency telephone number	:	+34964470212 +34 964 470 212

2. HAZARDS IDENTIFICATION

GHS-Classification

Not a dangerous substance or mixture according to the Globally Harmonised System (GHS).

GHS-Labelling

Not a dangerous substance or mixture according to the Globally Harmonised System (GHS).

3. COMPOSITION/INFORMATION ON INGREDIENTS

Chemical characterization	: essential oil
Molecular formula	: UVCB
Molecular weight	: 172.00 g/mol
CAS-No.	: 9000-45-7, 8016-37-3

4. FIRST AID MEASURES	
Inhalation	: Remove from exposure site to fresh air and keep at rest. Obtain medical advice.
Skin contact	: Remove contaminated clothes. Wash thoroughly with water (and soap). Contact physician if symptoms persist.
Eye contact	: Flush immediately with water for at least 15 minutes. Contact physician if symptoms persist.
Ingestion	: Rinse mouth with water and obtain medical advice.
5. FIREFIGHTING MEASURES	3
Suitable extinguishing media	: Carbondioxide, dry chemical, foam.
6. ACCIDENTAL RELEASE ME	ASURES
Personal precautions	: Avoid inhalation and contact with skin and eyes. A self-contained breathing apparatus is recommended in case of a major spill.
Version	: 1

Product	MYRRH RESOID 65% TEC BLO	
Print Date	29.04.2015 Page 2 (5	5)
Environmental precautions Methods for cleaning up	 Keep away from drains, surface- and groundwater and soil. Clean up spillage promptly. Remove ignition sources. Provide adequate ventilation. Avoid excessive inhalation of vapours. Gross spillages should be contained by use of sand or inert powder and disposed of according to the local regulations. 	
7. HANDLING AND STORAG	E	
Handling		
Advice on safe handling	 Avoid excessive inhalation of concentrated vapors. Follow good manufacturing practices for housekeeping and personal hygiene. Wash any exposed skin immediately after any chemical contact, before breaks and meals, and at the end of each work period. Contaminated clothing and shoes should be thoroughly cleaned before re-use. If appropriate, procedures used during the handling of this material should also be used when cleaning equipment or removing residual chemicals from tanks or other containers, especially when steam or hot water is used, as this may increase vapor concentrations in the workplace air. Where chemicals are openly handled, access should be restricted to properly trained employees. Keep all heated processes at the lowest necessary temperature in order to minimize emissions of volatile chemicals into the air. 	
Advice on protection against fire explosion	e and : Keep away from ignition sources and naked flame.	
Storage		
Requirements for storage areas a containers	and : Store in a cool, dry, ventilated area away from heat sources. Keep containers upright and tightly closed when not in use.	

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Verify if the substances declared in section 3 have relevant national exposure limits.

Personal protective equipment

Respiratory protection	 Use local exhaust ventilation around open tanks and other open sources of potential exposures in order to avoid excessive inhalation, including places where this material is openly weighed or measured. In addition, use general dilution ventilation of the work area to eliminate or reduce possible worker exposures. No respiratory protection is required during normal operations in a workplace where engineering controls such as adequate ventilation, etc. are sufficient.
Version Revision Date	: 1 : 24.03.2015
Revision Date	. 24.03.2013

	If engineering controls and safe work practices are not sufficient, an approved, properly fitted respirator with organic vapor cartridges or canisters and particulate filters should be used: a)while engineering controls and appropriate safe work practices and/or procedures are being implemented; or b)during short term maintenance procedures when engineering controls are not in normal operation or are not sufficient; or c)if normal operational workplace vapor concentration in the air is increased due to heat ; d)during emergencies; or e)if engineering controls and operational practices are not sufficient to reduce airborne concentrations below an established occupational exposure limit.
Hygiene measures	 To the extent deemed appropriate, implement pre-placement and regularly scheduled ascertainment of symptoms and spirometry testing of lung function for workers who are regularly exposed to this material. To the extent deemed appropriate, use an experienced air sampling expert to identify and measure volatile chemicals that could be present in the workplace air to determine potential exposures and to ensure the continuing effectiveness of engineering controls and operational practices to minimize exposure.
Protective measures	 In December 2003, the National Institute for Occupational Safety and Health ("NIOSH") published an Alert on preventing lung disease in workers who use or make flavorings [NIOSH Publication Number 2004-110]. In August 2004, the United States Flavor and Extract Manufacturers Association (FEMA) issued a report entitled "Respiratory Safety in the Flavor Manufacturing Workplace". Both of these reports provide recommendations for reducing employee exposure and for medical surveillance in the workplace. The recommendations in these reports are generally applicable to the use of any chemical in the workplace and you are strongly urged to review both of these reports. The report published by FEMA also contains a list of "high priority" chemicals. If any of these chemicals are present in this product at a concentration >= 1.0% due to an intentional addition by IFF, the chemical(s) will be identified in this safety data sheet.

9. PHYSICAL AND CHE	MICAL PROPERTIES
Appearance	
Physical state Colour	: liquid : reddish brown
Odour	: conforms to standard
Version Revision Date	: 1 : 24.03.2015

Product	MYRRH RESOID 65% TEC BLO
Print Date	29.04.2015 Page 4 (
Safety data	
Flash point	: 94 °C
Ignition temperature	: $> 100 ^{\circ}\mathrm{C}$
Vapour pressure	: < 0.01 hPa Note: Calculated
10. STABILITY AND REA	CTIVITY
Conditions to avoid	: Remarks: Direct sources of heat.
Hazardous decomposition p	broducts : Note: Carbon monoxide and unidentified organic compounds may be formed during combustion.
Hazardous reactions	: Presents no significant reactivity hazard, by itself or in contact with water. Avoid contact with strong acids, alkali or oxidizing agents.
11. TOXICOLOGICAL IN

16. OTHER INFORMATION

Further information

The information in this safety data sheet is based on the properties of the material known to IFF at the time the data sheet was issued. The safety data sheet is intended to provide information for a health and safety assessment of the material and the circumstances under which it is packaged, stored or applied in the workplace. For such a safety assessment International Flavors & Fragrances holds no responsibility. This document is not intended for quality assurance purposes.
